

FIRE INCIDENT IN BARC

Date Of Incident: 29/12/09

Location : Mumbai

Description of the accident:

Fire broke out in a laboratory around 12pm. It was doused by 1250 hrs. The fire occurred in one of the rooms of the third floor of the Modular Lab. Fire tenders were rushed to the spot and the blaze was doused within 45 minutes.

No.of persons affected:

Two young scientists were died.

Potential Root Cause:

No comments.

Other comments:

This is the third incident involving nuclear safety in our country.

It may be recalled that on December 8, depleted Uranium was found from three persons in adjoining satellite township of Navi Mumbai.

Last month, about 45 to 50 employees working in the maintenance unit of the Kaiga plant in Uttara Kannada district were treated at the plant hospital in Mallapur for increased level of tritium after they drank water from a cooler in the operating area on November 24.

SEED express its deepest condolence and pray the god to look after the families of the young scientist.
