

## ACCIDENT DUE TO JEWELS

**Date Of Incident: 10.09.2008**

**Location : Pune**

### **Description of the accident:**

In a particular machine, whenever the door is in open condition the machine will not run due to sensors. Once the door is closed, the sensor resume and function normally (Metal contact need to make functioning the sensor). On the Particular day of incident machine setter enter into the machine area with the door in open condition. Unfortunately his metal bracelet in the hand touches the sensor and machine functioned for a while. Due to that setter died on the spot due to the crush injury on his body parts.

### **No. of persons Injured:**

One

### **Potential Root Cause:**

Setter wears the metal bracelet in his hand and kept the hand near the sensor, Ref photos (Indiscipline activity against factory works)

**Lessons Learnt:** 1.Strict instruction and one point lesson given as a mechanic / Engineer / setter / operator / Electrician should not wear the metal bracelet or other jewels during working hours.

2. Sensor provided without sensing others than machine body .i.e 200 % safety needed for such critical machineries

3. Lock out Tag out system can reduce the severity.

**SEED express its deepest condolence and pray the god to look after the families of the young machine setter.**

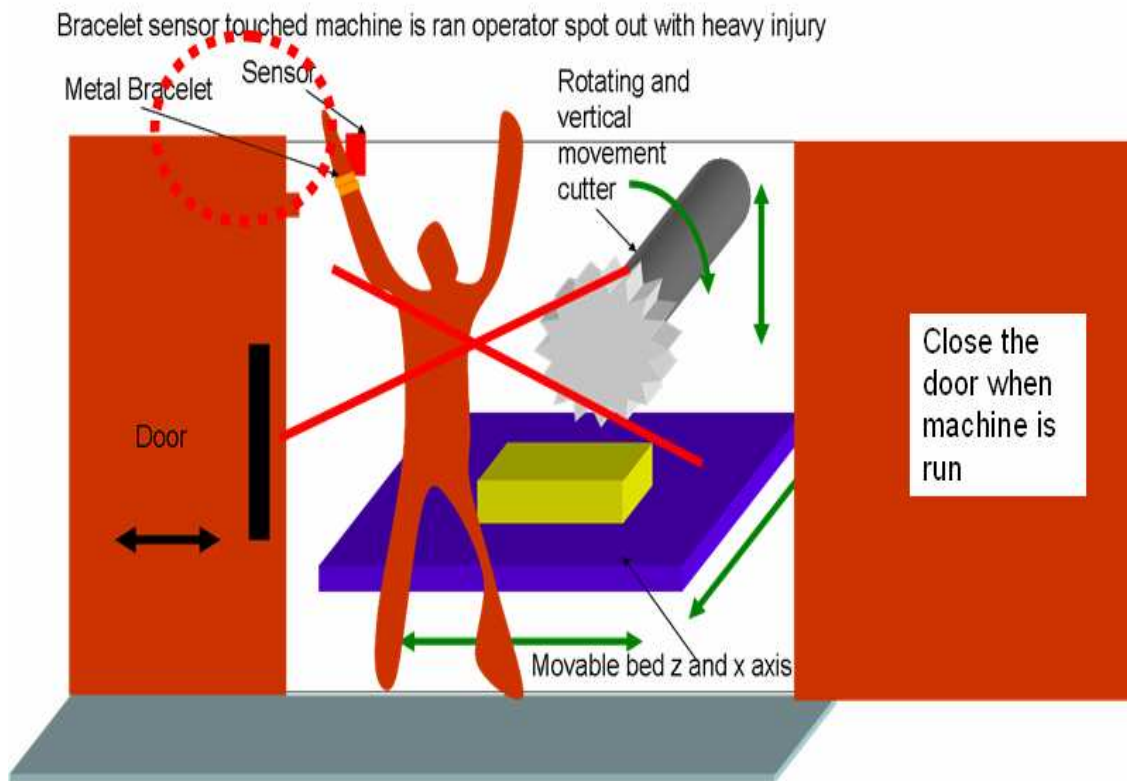

**Raised By : Mr.Parthiban Nagarajan, Sholinghur, Vellore dt.**
